

## PACK ASSIST OPTION FOR BUNCH FOLDERS

The Pack Assist is an added support where the forms or labels fall out from the spirals after folding. The support can be moved laterally to provide optimum support and "shingle" of the forms or labels on the delivery table given a variety of paper and liner weights and lengths. The Pack Assist virtually eliminates the need to raise or lower the back of the delivery table for different forms or labels.

The Pack Assist is supplied as standard equipment on new 600, 1000, and 1250 Series Folders. It is an option on new 300, 515, 590 and 500 Series Folders.

**The Pack Assist retrofits to older Fan Folders.**
